EXPERIENCE

Associate Software Engineer

Upcore Technologies

📅 March 2024 - Present

📍 Mohali

- Built and optimized React-based UI components, including reusable modules and dynamic admin dashboards, to streamline the user experience.
- Developed backend REST APIs using Node.js for seamless data integration and application functionality.
- Conducted Proof of Concept (PoC) work in Generative AI, including an auto-blog generation tool and a Slack-integrated solution.
- Utilized FastAPI in Python to create high-performance APIs and leveraged Streamlit for UI masking, enhancing data interactivity.

Associate Software Engineer

Instep technologies

📅 Feb 2023 - Dec 2023

📍 Panchkula

- Worked on the design and implementation of Job Portal for Geeksporters.
- Developed dynamic, feature-rich applications using React.js and node.js, focusing on scalability and maintainability.
- Played a pivotal role in code reviews and team mentorship, fostering a collaborative and high-performing environment..
- Delivered key project modules within tight deadlines, ensuring they met client specifications and quality standards.
- Worked closely with designers to implement pixel-perfect user interfaces and seamless animations.
